

Eco-Bac

Eco-friendly cosmetic grade hypoallergenic anti-bacterial liquid hand soap for the effective control of germs and bacteria. Cleans and moisturizes skin for a long lasting soothing and luxurious feel.

Description:

Eco-Bac anti-bacterial liquid hand soap is an environmentally friendly personal care cleanser which is a blend of the highest quality hypoallergenic cosmetic grade ingredients that is designed to clean hands and skin, and leave a luxurious smooth feel while helping to eliminate pathogens. It is highly effective against a wide range of germs and bacteria, and reduces the risk of infection and cross contamination in the workplace.

Workplace Infection:

Germs that cause common illnesses are invisible to the naked eye. No matter where you are, germs are spread from person-to-person and by touching everyday surfaces. Studies prove that humans now share more common surfaces with each other in history. Enclosed workplace environments are an exponentially higher risk for the spread of germs. Poor hygiene leads to increased illness and this results in disruption cost, lost productivity,

and reduced employee efficiency. Hands are the single most effective method of spreading germs, yet over half of all workers do not know the basics of hand washing. The average hand washing duration is less than 10 seconds, missing vital areas where germs are commonly found (e.g. under fingernails and on the backs of hands). As hands are responsible for the spread of 80% of infectious diseases, effective hand hygiene is universally recognized as the smartest, most cost effective means of infection control in the workplace, helping to minimize wasted time and resources and save organizations money all year round.

Features & Benefits:

Eco-Bac liquid hand soap is very gentle on the skin and leaves a light, lingering, clean fragrance. Eco-Bac contains the highest quality emollients that leave the skin feeling soft and warm. It has a soothing hypo-allergenic on the skin and eyes and is safe for all skin types. Eco-Bac will not cause dryness, irritation or inflammation of the skin. Eco-Bac is environmentally friendly and biodegradable, and has been formulated in accordance with cosmetic chemistry, with cosmetic grade anti-bacterial agents to sanitize the skin and provide additional germ protection. Ecozyme Eco-Bac is made of natural ingredients from renewable sources and their derivatives making it a truly green eco-friendly product.

Applications:

Eco-Bac anti-bacterial hand soap is excellent for these functions:

- Cleaning food and soils from hands after food preparation
- Eliminating germs and bacteria and preventing cross contamination in the workplace
- For its ability to leave a lovely, moisturizing, soft skin touch
- Helping hands to rehydrate, leaving your skin feeling soft, moist and rejuvenated
- Hypoallergenic formulation means it's safe for all skin types and won't cause dryness, cracking or inflammation

Correct Washing Procedure:

Wet your hands with clean, running water (warm or cold), turn off the tap, and apply soap. Lather your hands by rubbing them together with Eco-Bac. Be sure to lather the backs of your hands, between your fingers, and under your nails. Scrub your hands for at least 20 seconds. Rinse your hands well under clean, running water. Dry your hands using a clean towel or air dry them.

Packaging, Shelf Life, Storage:

Stable for 12 months at ambient temperature, out of direct sunlight. Available in 5L, 25L & 1000L flow bins. Super concentrate available for simple self-manufacturing.
