

Greywater Gobbler™

Advanced odour controlling
microbial formulation for
greywater systems

Rapidly digests organic matter
from dishwashing, laundry, shower
and basins

Biological enzyme producing
formulation produces cleaner
water for irrigation purposes

Purely microbial formulation is
harmless to plant life and aids root
structures with nutrient absorption

Highly economical super
concentrated formulation

Product Description:

Effluent from dishwashing, laundry,
shower and basins contains organic
material which when naturally
biodegrading emits foul smelling odour
causing components including sulphur.

Greywater Gobbler™ is a highly
advanced microbial formulation
containing a specially selected
consortium of synergistic bacteria which
rapidly produce massive concentrations
of digestive enzymes which quickly
reduces malodours.

Its super concentrated formulation
contains over 100 million microbes
per 1ml of liquid! Every 20 to 40
minutes these microbes keep
doubling to form billions of offspring.

EcoZyme
Eco Chemicals Bio Enzymes

Product Features:

- Rapidly reduces odours
- Makes greywater suitable for irrigation
- Aids plant root structures with absorbing nutrients
- Advanced synergistic microbial formulation
- Produces up to 9 different digestive enzymes
- Super concentrated formulation – 1 x 10⁸ microbes per ml
- Highly economical formulation means dosing much less product
- Dose into drain lines, showers, and sinks to eliminate organic blockages and keep lines flowing freely
- Save costs by reducing plumbing call outs

Recommended Applications:

- Greywater systems
- Septic tanks (turns solids into liquids)
- Drain
- Showers
- Sinks

Recommended Use:

Apply 25ml per 100 litres of greywater or septic tank volume until the odour is eliminated. Repeat as necessary. For drain, sink and shower line maintenance, dose 50ml with warm running water at night before sleeping.

NB Avoid using bleaches, harsh chemicals and acid cleaners as these will kill our good bacteria. Ecozyme has a full range of probiotic microbial based products which replace all traditional harsh chemicals and benefit Greywater Gobbler™ to further improve greywater and septic systems.

Shelf Life, Storage & Precautions:

Store in cool, dry place out of direct sunlight. Stable for 12 months.
