

# Drain Gobbler™

**A potent dual function enzymatic and biological unblocking agent for use in drains, grease traps, plumbing lines, sinks, showers, surgical drains, pump stations, sewer lines and more. Rapidly digests organic build ups while providing long term free flowing drains with odour, fly and pathogen control.**

## Product Description:

Drain Gobbler™ is a powerful, eco-friendly multi-functional treatment for organic drain blockages and maintenance. Its dual formulation contains multiple extracted enzymes for instant response, and then specially selected microbes which produce massive concentrations of digestive enzymes. Unlike chemical products which temporarily change the state of the blockage only to have them reappear shortly downstream, the intelligent digestive microbes in Drain Gobbler™ permanently convert blockages and waste into carbon dioxide and water.

## Rapid 2 Step Function:

As opposed to biological only systems, the extracted MultiZyme 5 Enzyme system in Drain Gobbler™ gets to work within seconds after

application with its highly versatile Protease, Alpha-amylase, Pectate Lyase, Lipase and Mannanase enzymes which break down the fats, oils, greases, blood and other organic matter into their component parts. The billions of microbes present in formulation then rapidly secrete digestive enzymes to permanently digest the organic waste, doubling every few minutes, to completely colonize the affected area and keep on effectively working for days to weeks after application.

## 9 Enzyme Biological System:

Contains Ecozyme's class leading 9 biological enzyme production system to digest organic wastes:

- ✓ Lipase
- ✓ Amylase
- ✓ Urease
- ✓ Protease
- ✓ Cellulase
- ✓ Esterase
- ✓ Phosphatase
- ✓ Hemicellulase
- ✓ Xylanase

## Odour Control:

Organic effluent is a primary source of foul odours which bother clients, neighbours and employees. Drain Gobbler™ Plus quickly eliminates anaerobes which are responsible for the foul and noxious malodours.

## Control Pathogens:

Listeria and other pathogens can be resistant to conventional

disinfectants such as QAC's. Through the scientific process of Competitive Exclusion, the specially selected micro-organisms in Drain Gobbler™ take the food and space away from pathogens, starving them to death for long term pathogen control.

## Applications:

- ✓ Drains
- ✓ Grease Traps
- ✓ Sewer Lines
- ✓ Showers
- ✓ Basins
- ✓ Kitchen Sinks
- ✓ Surgical Drains
- ✓ Pump Stations and much more

## Directions For Use:

Dose at the close of business, quiet times, or at night before sleeping.

**Home:** 250ml shock dose, then 125ml per week maintenance dose.

**Commercial:** Up to 500ml shock dose, then up to 250ml per week maintenance dose.

## Product Advantages:

- ✓ Rapidly eliminate blockages
- ✓ Reduce COD, TSS and BOD's
- ✓ Benefit waste systems
- ✓ Reduce odours
- ✓ Control flies
- ✓ Save costs
- ✓ Healthier environment

## Packaging, Shelf Life, Storage

Stable for 12 months at ambient temperature, out of direct sunlight. Available in 5L, 25L and 1000L.
