

Eco-Rinse Auto

Hospitality industry auto dishwasher rinse aid with low foam rinse agents and sequesterants to rinse crockery and cutlery efficiently and prolong times between machine maintenance cleaning.

Automated Washing Systems

Automatic dishwasher and rinse systems represent a tremendous saving in time and effort; they minimize breakage through the reduced handling of dishes; they help keep the kitchen neater and more clutter-free; and clean up processes are greatly simplified. Labour savings are very significant, with a perfect wash occurring every time. Less water is used, and utility consumption can be significantly lowered.

These are benefits that have much appeal to commercial kitchens and consumers. However the benefits of an even the very best dishwasher and rinse systems can only be properly realized with the finest specially formulated eco detergents.

Product Description:

Eco-Rinse Auto rinse aid is ideally suited to use in the hospitality industry where its blend of low foam rinse agents and

sequesterants helps both to efficiently rinse crockery and cutlery as well as prolonging times between machine maintenance cleaning.

Features & Benefits:

Eco-Rinse Auto rinse aid is a blend of quick drying, low foaming cleaning ingredients and sequesterants to promote the effective rinsing of cutlery and crockery. It is simple easy to meter out through a peristaltic pump as programmed for this purpose. Recommended pump is the Ecozyme Advanced Dosing Unit. Eco-Rinse Auto rinse aid helps to promote fast drying after the rinse cycle. It is low foaming at automatic dishwasher temperatures which promotes best spraying from the pressure nozzles, thus best contact with the objects to be rinsed.

Water Hardness:

Less than ideal water quality is a major challenge, and water hardness plays a key role in struggling to get effective results. Minerals and other dissolved solids in water present obstacles to good automatic dishwashing results. Hardness minerals can cause spotting and filming on dishware. They must be effectively tied up or sequestered in the water if the results are to be satisfactory.

Eco-Rinse Auto is designed to perform exceptionally in areas where water quality and water hardness is an issue. Eco-Rinse Auto is intelligently formulated to effectively convert dirt deposits into small suspended particles that rinse away without redepositing on freshly washed plates and cutlery. Ecozyme Auto-Wash It is specially designed to form a protective film on metal surfaces in the automatic washer for a greater machine lifespan.

Applications:

Eco-Rinse Auto rinse aid is applied:

- * To rinse dishes
- * To rinse stainless steel cutlery

Use & Dilutions:

Automatic Dishwasher Rinse Aid should be metered through a peristaltic pump for best results. This will ensure that the correct amount of chemical is used for the most economical operation. We recommend that you use Eco-Rinse Auto rinse aid in tandem with Ecozyme Auto-Dish dishwasher detergent liquid for best results with your dishwasher cleaning.

For Best Results:

Use with Ecozyme's full range of bio-enzymatic products which benefit each other as you use them. Save money and improve performance while reaping multiple benefits compared to traditional
