

## Probiotic General-Purpose Cleaner

Odour eliminating highly concentrated probiotic general-purpose cleaner

Convenient trigger dispenser system

9 Enzyme System for unmatched cleaning and odour control

Benefits septic and plumbing systems

### Green Probiotic Power:

Ecozyme probiotics are highly intelligent. They immediately analyze their intended target and quickly secrete the precise type and massive concentrations of digestive enzymes.

The target is permanently broken down into essentially carbon dioxide and water.

Through the process of Competitive Exclusion, our probiotics ensure a long-term and much healthier environment is created.

Cultivated from South African soils and all locally manufactured, Ecozyme probiotics have been conclusively proven to save money over even harsh chemicals.
