

## Probiotic Heavy Duty Degreaser

Odour eliminating highly concentrated probiotic degreaser

Convenient trigger dispenser system

High pH system to cut through even the toughest greases

9 Enzyme system for unmatched cleaning and odour control

Benefits septic and plumbing systems

### Green Probiotic Power:

Ecozyme probiotics are highly intelligent. They immediately analyze their intended target and quickly secrete the precise type and massive concentrations of digestive enzymes.

The target is permanently broken down into essentially carbon dioxide and water.

Through the process of Competitive Exclusion, our probiotics ensure a long-term and much healthier environment is created.

Cultivated from South African soils and all locally manufactured, Ecozyme probiotics have been conclusively proven to save money over even harsh chemicals.

### Product Benefits:

- High pH grease buster system
- Cleaner surfaces and equipment
- Create a healthier environment
- Heavy duty degreaser
- Benefits septic and plumbing systems
- Phosphate free
- Non caustic formulation
- Eco-friendly
- Industry leading 9 enzyme system
- Super high foaming action
- Highly economical – replaces all chemicals
- Non-toxic
- Non-volatile
- Non-corrosive

### Other Applications:

- Kitchen cleaner
- Oven cleaner
- Cutting board degreaser
- Dustbin degreaser
- Garage oil cleaner
- Driveway oil cleaner
- Engine degreaser
- Tool degreaser
- Mag wheel cleaner
- Paving cleaner
- Braai grid cleaner
- Shower & bath body fats
- Drain unblocker
- And much more!

### Applications In Industry:

Ecozyme bio-enzyme and eco-friendly chemical products are widely used by major blue-chip companies per key industry in South Africa and for global export.
