

# Waterless Wash & Shine

**Waterless environmentally friendly bio enzyme wash and shine cleaner for cleaning vehicles and more, while saving hugely on water and then helping to digest oil dirt into water and carbon dioxide.**

## Description:

Waterless Wash & Shine is an eco-friendly waterless one step product for effortlessly cleaning and shining automotive surfaces and more. Waterless Wash & Shine has a high lubrication formula for a superb scratch free results, and is uniquely formulated with bio-enzymes which aid cleaning efficacy and digests hydrocarbon effluent into water and carbon dioxide.

## Kinder To The Environment:

Did you know that a standard garden hosepipe uses nearly 40 litres of water per minute? That means consuming a massive 400 litres of water for a quick 10 minute car wash! Water is a precious resource that is often in short supply and should be sparingly used.

## Highly Economical:

Just 5L of Waterless Wash & Shine will treat between 20 and 25 cars, making it highly economical and cost effective. It's also much kinder to the

environment, using a fraction of the water normally needed for washing.

## Features & Benefits:

Waterless Wash & Shine is extremely simple and effective to use and is designed to remove vestiges of light traffic film that have become engrained with particulate soils, in a way that needs little mechanical assistance, saving the vehicle's top coat from abrasion. It's non-abrasive and high gloss formula safely cleans the vehicle's surface and removes light dirt, dust and general road grime.

## Bioremediating Oil Dirt:

Bioremediation is the natural process of biologically converting hazardous chemicals, such as hydrocarbons, into non-toxic by-products using microbes, enzymes, oxygen and other nutrients. Bioremediation can provide the opportunity for facilities to eliminate and/or reduce hazardous waste, workplace health and safety risks, environmental liability and costs.

## International Benchmark:

The hydrocarbon degrading microbes used by a well-known international petrochemical company were independently laboratory tested against the indigenous microbes in found in Ecozyme's Oil Gobbler products. The comparison showed a near identical

Total Petroleum Hydrocarbon (T.P.H.) degradation. An unexpected result showed the Oil Gobbler™ microbes degrading waste at a staggering 20% faster rate with profound further cost, performance and environmental advantages.

## Applications:

- ✓ Vehicles
- ✓ Caravans
- ✓ Busses
- ✓ Trains
- ✓ Boats
- ✓ Jet Skis
- ✓ Motor Cycles
- ✓ Bicycles

## Use & Dilutions:

Work in a shaded area for best results. Lightly mist spray Waterless Wash & Shine onto the surface of the vehicle. Clean one body panel at a time. Allow 1 minute contact time to loosen and start lifting the dirt. Gently rub in a circular motion to lift away the dirt. Only use with a micro-fibre cloth. Do not use on very muddy or heavily soiled surfaces, in this instance first rinse off excess mud or dirt to prevent scratching the surface of the vehicle.

## Packaging, Shelf Life, Storage

Stable for 12 months at ambient temperature, out of direct sunlight. Available in 5L, 25L & 1000L flow bins. Super concentrate available for simple self-manufacturing while saving greatly on shipping costs.
